

Groundstation::Groundstation

Preflight::Preflight

NetworkManager::changeNodeType

```
graph LR; A[Groundstation::Groundstation] --> C[NetworkManager::changeNodeType]; B[Preflight::Preflight] --> C;
```

The diagram illustrates a directed graph with three nodes. On the left, there are two white rectangular nodes: 'Groundstation::Groundstation' at the top and 'Preflight::Preflight' below it. On the right, there is a gray rectangular node labeled 'NetworkManager::changeNodeType'. Two blue arrows originate from the right side of the left nodes and point towards the left side of the gray node, indicating a directed relationship from both 'Groundstation::Groundstation' and 'Preflight::Preflight' to 'NetworkManager::changeNodeType'.
