

state_t

```
graph BT; Estimator[Estimator] -.->|state| state_t[state_t];
```

The diagram illustrates a data flow from an 'Estimator' block to a 'state_t' block. The 'Estimator' block is a gray rectangle at the bottom, and the 'state_t' block is a white rectangle at the top. A dashed purple arrow points from the 'Estimator' block to the 'state_t' block, with the label 'state' positioned to the right of the arrow.
